Experience

Inventiff Soft SRL | 2025 – Present

Develop and maintain WordPress websites using custom themes, CSS, JavaScript, and PHP. Build custom plugins and implement responsive pages based on project requirements. Handle ongoing maintenance, updates, technical fixes, and performance improvements, while also contributing to UI, layout, and design decisions.

KeyForge | 2024 – present

Founded and developed KeyForge, a hardware and software project focused on productivity devices. Built and maintained the website and online store, and developed the cross-platform configurator application. Worked across UI design, product development, 3D rendering, technical documentation, branding, and the overall customer experience.

Prodigy IT Solutions | 2021 – 2023

Developed web applications and maintained legacy projects, including applications integrated with blockchain contracts and the Electric Castle internal accreditation platform. Implemented new functionality, resolved technical issues, and adapted existing applications to changing project requirements. Collaborated directly with clients to identify practical technical solutions.

DailyRoads | 2019 – 2021 | part-time

Developed and maintained websites and web applications using React and WordPress. Implemented responsive interfaces, new functionality, and project-specific updates. Diagnosed frontend and WordPress-related issues and helped ensure the continued functionality and consistency of existing websites.

Freelancing

Worked with various businesses on website development, frontend implementation, responsive styling, maintenance, and project-specific improvements. Collaborated directly with clients to understand their requirements and translate them into functional websites. Selected projects include:
Roi Honey Goods Shop: roihoneygoods.com
BlindDots Website: blinddots.ro
Unipaths: unipaths.com
Flowster : oamenisanatosi.srl
Arriaverlag: arriaverlag.de
